-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3738

The Declaration under 37 CFR 1.132 filed April 5, 2005, is insufficient to overcome the rejection of claims 23, 24, 28, 30-37, and 40-44 based upon Silvestrini et al., US 5,300,118, as set forth in the last Office action because it lacks an *unequivocal* declaration that Mr. Silvestrini conceived or invented the subject matter disclosed in the patent *and relied on in the rejection* (MPEP 715.01(a)). Moreover, MPEP 2136.05 indicates that there must be a *showing or proving* of conception or invention by, for example, proving that the co-inventors of the patent were associated with the Applicant and learned of the Applicant's invention from the Applicant or showing that the applied patent disclosure arose from the Applicant's work coupled with a showing of conception by the Applicant before the filing date of the patent. The Applicant refers to *In re Katz* (215 USPQ 14), which involved an applied reference in the form of a publication in the proceedings of the National Academy of Science. In the Declaration under 37 CFR 1.132, the Appellant stated that the co-authors "were students working under the direction and supervision of the inventor, Dr. David H. Katz" and that the Appellant is the sole inventor of the subject matter disclosed in said publication. The facts as presented by the Applicant are, however, not equivalent to the situation in *In re Katz*, because in the instant application, the applied reference is a U.S. patent, so that the joint inventors are presumed to be inventors of at least some of the subject matter disclosed therein.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3738

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23, 24, 28, 30-37, and 40-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Silvestrini et al., US 5,300,118: Figures 11A and 11B; column 2, lines 13-15; column 3, lines 60-68; column 6, lines 47-50 and 58-60; and column 10, lines 14-27 and 38-42. Regarding claim 44, the sections are removable after implantation in the sense that the entire device is *capable* of being removed after implantation.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114.

Art Unit: 3738

Reference is made to MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

This application contains claims 38 and 39 drawn to an invention nonelected in Paper No. 14. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144; MPEP § 821.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Willse whose telephone number is (571) 272-4762. The examiner can normally be reached Monday through Thursday and often on Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott, can be reached at (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
